

US MUSCULOSKELETAL REVIEW

MEDIA PACK

Supporting physicians,
clinicians, and related
healthcare professionals in
continuously developing their
knowledge, effectiveness,
and productivity

Overview

US Musculoskeletal Review is a peer-reviewed annual journal comprising review articles, case reports, practice guides, theoretical discussions, and original research. It features balanced and comprehensive articles written by leading authorities, addressing the most important and salient developments in the musculoskeletal field.

US Musculoskeletal Review endeavors to support physicians, clinicians, and related healthcare professionals in continuously developing their knowledge, effectiveness, and productivity. The editorial policy has been designed to encourage discussion among this peer group.

Editorial Expertise

US Musculoskeletal Review is supported by various levels of expertise:

- Guidance from an Editorial Board consisting of leading authorities from a variety of respiratory disciplines.
- Invited contributors are recognized authorities from their respective fields.
- Peer review conducted by experts appointed for their experience and knowledge of a specific topic.
- An experienced team of Editors and Technical Editors.
